Contents of Volume 44

Number 1

1 A Pulsed Level Difference Technique for Ground Characterization
DAVID W. CRAIG & JAMES M. SABATIER (USA)

7 Acoustical Properties of Wooden Loudspeakers Used in an Artificial Reverberation System
GUNILLA BERNDTSSON (Sweden)

25 Wave Propagation in a Piezoelectric, Continuously Twisted, Structurally Chiral Medium Along the Axis of Spirality
AKHLESH LAKHTAKIA (USA)

39 Development of a Novel Modular Form of Sound Absorbent Facing for Traffic Noise Barriers
F. J. FAHY, D. G. RAMBLE, J. G. WALKER & M. SUGIURA (UK)

53 Computer Prediction of Sound Distribution in Enclosed Spaces Using an Interference Pressure Model
S. M. DANCE, J. P. ROBERTS & B. M. SHIELD (UK)

67 Application of Statistical Moments to Bearing Failure Detection
H. R. MARTIN & F. HONARVAR (Canada)

Technical Note

79 The Anechoic Chamber at the Laboratorio de Acústica y Luminotecnica CIC
A. G. VELIS, H. G. GIULIANO & A. M. MÉNDEZ (Argentina)

95 Announcements

97 Calendar

Number 2

99 Modeling and Applications of Partially Perforated Intruding Tube Mufflers
H. LUO, C. C. TSE & Y. N. CHEN (Taiwan)

117 Discrete Component Equivalent Circuit for Webster's Horns
PETER LESNIEWSKI (Australia)

125 Dynamic Stiffening of Circular Plates and Determination of Their Buckling, In-Plane Pressure
PATRICIO A. A. LAURA, HILDA LARRONDO, DANIEL R. AVALOS, DIANA V. BAMBILL, ROBERTO CARNICER & HECTOR C. SANZI (Argentina)

133 Low-Frequency Impact Sound Insulation of a Light Weight Wooden Joist Floor
CARIN JOHANSSON (Sweden)

149 Generation of Ground Vibrations by Superfast Trains
VICTOR V. KRYLOV (UK)

165 Quantitative Comparison between Noise Reduction Factors of Drainage Asphalt Pavement
S. MEIARASHI, F. NAKASHIBA, H. NIIMI, M. HASEBE & T. NAKATSUJI (Japan)

World Acoustics

181 Acoustics at the National Research Council (Canada)
GILLES A. DAIGLE, JEAN-PIERRE MONCHALIN, J. DAVID QUIRT, GEORGE S. K. WONG & DAVID G. ZIMCIK (Canada)

193 Announcements

194 Calendar

Number 3

195 Measuring Impulse Responses with Digitally Pre-emphasized Pseudorandom Noise Derived from Maximum-Length Sequences
E. MOMMERTZ & S. MÜLLER (Germany)

215 Vibration Studies on Completely Free Shallow Shells Having Triangular and Trapezoidal Planforms
MOHAMAD S. QATU (USA)

233 The Measurement of Structural Intensity in Buildings
ROBERT J. M. CRAIK, RUISEN MING & ROBIN WILSON (UK)

249 Design of Piezoelectric Sandwich Ultrasonic Transducers with Large Cross-Section
LIN SHUYU (People's Republic of China)

259 A Simple Method to Evaluate the Increase of Traffic Noise Emission Level Due to Buildings, for a Long Straight Street
K. HEUTSCHI (Switzerland)

275 A Numerical Scheme for the Analysis of Perforated Intruding Tube Muffler Components
CHAO-NAN WANG (Taiwan)

287 Announcements

288 Calendar

Number 4

291 Barriers' Efficiency Dependence on Types of Environments
E. WALERIAN, M. CZECHOWICZ & R. JANCZUR (Poland)

325 Natural Frequencies of Rectangular Stepped Plates Using Polynomial Beam Functions with Subsectioning
K. Y. LAM & G. AMRUTHARAJ (Singapore)

341 The Application of Sound Intensity Technique in Research on Noise Abatement in Ships
STEFAN WEYNA (Poland)

353 Multiple-Edge Noise Barriers
D. H. CROMBIE, D. C. HOTHERSALL & S. N. CHANDLER-WILDE (UK)

Technical Notes

369 Surface Wave Generation on Light-Induced Periodical Structures
J. ŠTELINA & J. BRACINÍK (Slovak Republic)

375 Development of Experimental Techniques to Minimise the Leakage Errors Involved in FFT Based Measurements
CÜNEYT ÖZTÜRK (Turkey)

383 Book Review

385 Errata

386 Calendar
